

## **Standards**

### **Heat Treated Products**

All heat treated glass manufactured by Contract Glass Service, Inc. shall be constructed with float glass which meets the requirements of both ASTM C-1036 and ASTM C-1048; the standard specifications for flat and heat treated glass. All fully tempered glass shall meet the test requirements of ANSI Z97.1 and the CSPC standard for architectural glazing materials, 16 CFR 1201, categories I and II. Fully tempered glass complying with the performance characteristics specified in these standards shall be permanently identified with the Safety Glazing Certification Council (SGCC) label indicating certification of the product through independent third party testing.

### **Sealed Insulating Glass Products**

All sealed insulating glass units manufactured by Contract Glass Service, Inc. shall be constructed with flat glass which meets the requirements of ASTM C-1036, and if heat treated C-1048, the standard specifications for flat and heat treated glass.
